AFFIDAVIT OF CELIA MONROY

State of California

Los Angeles County

I CELIA MONROY , attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Celia Monroy. My address is 1801 Grinville, Santa Ana Ca. 92704.
2. Soy un padre voluntario promotor de la educacion en mi comunidad, como padre
estoy muy preocupada de la salud en general no solo en mi comunidad sino tambien en
toda region ya que afecta a nuestra poblacion en general.

3. I was shocked to learn that RF Guidelines have been set without the benefit of credible
studies performed on the health impact to humans, animals, and environment relative to
RF impact.

4 Me he informado de esta situacion ya que en mi misma comunidad han querido poner
una antenna muy cerca a menos de 200 metros de una primaria donde asiste actualmente
mi hijo, y como padre no quiero que con el tiempo me digan que mi hijo tiene cancer por
existir este tipo de antenas peligrosas para la salud. Por lo que les pido pongan solucion
a este problema , tenemos que trabajar en buscar soluciones de salud para el ser humano
ya que esto nos afecta a todos, si las RF son mas altas obviamente el impacto de salud en
mas.

5. La tecnologia ahora en dia esta tan avanzada que es tan peligrosa si no la controlamos entiendo que como companias queremos subir nuestros ingresos, tener lo mas innovador para avanzar en comunicaciones pero no nos damos cuenta que estamos contaminando nuestro planeta y por consiguiente a futuro exterminarnos nosotros mismos, por favor seamos como cientificos mas concientes de nuestra existencia.

6. There are compelling arguments supporting the FCC modify RF Guidelines mandating inclusion of credible studies performed on the health impact to humans, animals, and environment relative to RF impact, and that those guidelines work to prevent or minimize negative impacts.

7. Over two (2) million viewers/subscribers have seen and/or read about the positive impact One Million NIU has had on families and community relative to empowering NIU's (New Internet Users) to early adaption of on-line resources for improved quality of life.

8. The documentary by James Russell, [Resonance – Beings of Frequency](#)(Nov2012) explains well the impact RF waves have on the very existence of life and how the Earth's magnetic field's share space with RF waves. They must co-exist, to stymie the Earth's delicate balance of these waves threaten the very existence of life. Such hypothesis warrants inclusion in considering RF Guidelines.

9. Dr. Roger Coghill, Bioelectromagnetic research, “the radiation environment has increased many millions of times from what it was 30 years ago.” Understanding the impact of this “million times increase” is worthy of consideration into the writing of RF Guidelines, as it is hypothesized to have negative health impacts.

Respectfully submitted by

Celia Monroy
